

Relax and spend some time with us.

Take relaxed walks around the farm, do some bird watching and take the children to watch the cows being milked.

Guest Comments

- Beautiful place amongst the trees, nothing was an effort to the helpful and friendly staff.
- Could not have asked for more from the team.

Bird Checklist

Updated August 2016

158 species

A checklist of all the bird species seen at Random Harvest Nursery in all the habitats present. This includes the nursery area with its large acacias, trees and shrubs, surrounding gardens, the grassland, the dam at the bottom of the property and bushed areas on the property, as well as the exotic trees that are present. Overflying birds can be added to the list.

The abundance code gives an indication of relative abundance as well as seasonality; e.g. 1a would be a common summer migrant and 3 would be an uncommon South African resident species.

For any additional species seen contact Linda de Luca on linda@rhn.co.za

A = Abundance Code
1: Common – regularly recorded
2: Scarce – occasionally recorded
3: Uncommon – seldom recorded
4: Vagrant – local rarity
a: Summer Migrant – Eurasian or intra-African summer visitors (mostly Sep-Apr)
b: Winter Migrant – regional or altitudinal visitor (mostly May-Sep)
